

**Information Memorandum and Pre-Contract Document****PRESTIA MULTIMONEY FOREIGN CURRENCY SAVINGS DEPOSIT**

Please read this document carefully. Before investing in foreign currency deposits, you should have a full understanding of the product, associated risks, and commissions described below.

The Yen-equivalent value you would receive may be less than the amount of Yen you initially deposited.

**Risk of PRESTIA MultiMoney Foreign Currency Savings Deposit**

There is no risk of loss of principal in the deposited foreign currency, but there is a possibility that the Yen-equivalent value you receive including interest may be less than the original Yen-equivalent value of the deposited foreign currency in case the exchange rate of the deposited foreign currency against Yen fluctuates and results in Yen appreciation.

**Summary of Commission**

The exchange rates that are used to convert Yen into foreign currency and vice versa include the exchange commission. An additional charge will be applied for handling of US dollar / Euro cash.

**Other Conditions**

Deposits in foreign currencies have country risks such as fluctuations in foreign currency rates, decreased liquidity, and the possibility for dysfunction in foreign exchange markets caused by changes in economic and political situations, as well as changes in regulations, etc. Certain transactions may also be restricted, such as a restriction on the withdrawal of deposits.

Particularly, emerging-market currencies such as South African Rand (ZAR), Chinese Yuan (CNY), Turkish Lira (TRY), Mexican Peso (MXN), etc. have higher risk than currencies of developed countries. With regard to currency exchange, deposits, withdrawals, etc., such transactions may be restricted due to changes in regulations, etc.

Furthermore, emerging-market currencies carry the risk of a high level of fluctuations in foreign currency rates due to the economic and political situation of countries which issue the currencies.

Before transacting in emerging-market currencies, please be sure that you understand that transactions in these currencies have a relatively higher risk compared to transactions in the currencies of developed countries.
