#### Risk of Foreign Currency Deposit Service

Foreign currency bought by this service will be deposited to PRESTIA MultiMoney Foreign Currency Savings Deposit.

There is no risk of loss of principal in the deposited foreign currency, but there is a possibility that **the Yen-equivalent value you receive including interest may be less than the original Yen-equivalent value of the deposited foreign currency** in case the exchange rate of the deposited foreign currency against Yen fluctuates and results in Yen appreciation.

Particularly, emerging-market currencies such as South African Rand (ZAR), Chinese Yuan (CNY), Turkish Lira (TRY), Mexican Peso (MXN), etc. have higher risk than currencies of developed countries. With regard to currency exchange, deposits, withdrawals, etc., such transactions may be restricted due to changes in regulations, etc.

Furthermore, emerging-market currencies carry the risk of a high level of fluctuations in foreign currency rates due to the economic and political situation of countries which issue the currencies.

Before transacting in emerging-market currencies, please be sure that you understand that transactions in these currencies have a relatively higher risk compared to transactions in the currencies of developed countries.
